

▶ STUDENT FOCUS COMPANION

FocusGhost.

an always-on-top window that sits in the corner of the screen, tracks how you're spending your time during a study session, and gently nudges you back when you drift.

The four screens

every state the window can be in — compact, muted, always in the corner

LIVE

nice — 14 minutes focused on VS Code. you're in a rhythm.

9m ago

PATTERN NOTICED

your deepest focus today was right after opening VS Code — about 14 minutes before the first switch.

5m ago

you've switched away 5 times in the last 9 minutes. want a short focused sprint to reset?

GHOST INSIGHT

82% focus rate — your best rhythm yet. twitter pulled hardest around minute 12, but you got back within 3 minutes.

start new session

In-app nudge

the small, in-window nudge — appears inline when drift starts. softer, easier to dismiss than a popup.

ACTIVE · DRIFTING · IN-APP NUDGE

Nudge popups · interrupts

full popup windows tailored to the type of distraction. firmer for entertainment, softer for stuck or idle.

focusghost · nudge

● DISTRACTION · 3M 12S

twitter again?

you're 14 min into your calc problem set and twitter has won 3 of those minutes. it's still going to be there in 17.
